
Ear Extender

*** Forget batteries and wires, hear a crisp new sound**

Who says that the humble, hand-crafted Art of Chindogu can't compete with the mass-produced technological wonders being churned out by those electronic manufacturing giants? The Ear Extender is a sturdily built, water-resistant, battery-free hearing aid that's virtually fool-proof and guaranteed to work whatever the circumstances. No transistors to fiddle with, no cells to charge, and you'll never have to worry about losing these down the drain!
